EMBUGGY COMPANY PROFILE

**ISO9001-2008 VCA APPROVED EEC
DESIGN PATENT NO. 201530174335.0**

EMBUGGY was created by industry veterans (all 10+ years) to capture pent-up demand for these unique products and improve upon them. EMBUGGY has now crafted a fun, functional, and affordable street-legal vehicle. Our VINTAGE brand buggy is known and popular in France, and we have already received great interest from the rest of Europe and Africa, Asia, and Latin America. We currently have no direct competition in this niche category, and neither will you as the exclusive distributor for your territory!

What else sets EMBUGGY apart from potential competitors? To start, a 2-year warranty where others only offer 6 months or a year at best, since we have great confidence in our quality. Further, rapid production of new styles and plenty of accessories are on offer. What's more, like you, we know and understand the end-user - what they want, how to make it, and how to tell them about it. In these ways EMBUGGY is your ideal partner.

While still not a large company, we have modern comprehensive R&D and production facilities, including such equipment as a 3-D CNC plasma automatic tube-bending machine and a CNC plasma cutting machine. Most importantly, our manufacturing, QC, sales, and service processes are all exacting, thorough, strict, and efficient. They got that way because, unlike those potential competitors, we actually embrace continuous improvement not just talk about it. Our current annual capacity of 1000 vehicles is slated to increase steadily over the coming years.

Even more important, though, is the people using those facilities - since in fact they are our most valued resource. CEO Henry Wang and GM Jason Shao lead a team that includes highly skilled engineers and technicians in each key area - R&D, welding, molding, testing and QC/QA included. Rest assured, our confidence is well-founded as we realize our company and its products are only as strong as the weakest link. So we make sure not to have any weak links, period.
